

Handover Document

Project Name: Simple Banking Application

Handover Team: E

Receiving Team: ...

Completed Tasks:

1. Black Box Testing
2. White Box Testing

Testing:

1. RegandLoginTest.java contains the black box tests for registration and login features. It also contains white box tests for loadUsers and loadTransactions methods.
2. AppCLITest.java contains black box tests for AddMoney, WithdrawMoney, and ViewTransactionHistory methods. It also tests a white box test case adding negative money.

Handover Meeting:

During the handover meeting with the previous team, the following topics were discussed:

1. Refactoring of code was explained. Some lines of codes were added and visibility of most of the methods was changed from private to protected.
2. The test cases are all self-sufficient. No user input is required.
3. All the features were tested and verified. Additional methods were also tested to check error handling.
